DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Appeal Brief, filed 1/8/2004 (page 3), with respect to claims 1-5 have been fully considered and are persuasive. The rejection of claims 1-5 has been withdrawn.

Allowable Subject Matter

2. Claims 1-5 are allowed.

3. The following is an examiner's statement of reasons for allowance:

* The present invention provides a new method for image coding using embedded zerotree patterns and bitplanes (EZPAB) to allow for the optional use of no-entropy coding mode and context-based arithmetic coding mode, which gives a good tradeoff between computational complexity/power consumption and coding efficiency, and it also consumes minimal amount of memory, which size is independent of image sizes (see specification, page 2, paragraph 5).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- said value and tree indication for one of said children nodes is skipped when determinable from encoding of the other of said children nodes of said cluster (see sole independent claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
